WORDS FROM THE PRESIDENT

We are living in a pivotal moment in the history of public health. The global events of recent years have made it crystal clear: **prevention, science, and international cooperation are not optional—they are essential, structural necessities**. It is in this context that **Global Sani Hub** emerges, as a bold and visionary initiative placing the Canary Islands at the heart of Europe's leading health innovation ecosystems.

This hub is not merely a collaboration platform—it is an active response to today's most pressing challenges: population ageing, the rise of chronic diseases, global health threats, and inequalities in access to effective care. In the face of this, we stand behind a model that combines **technology, sustainability, and preventive health**, launching from the Canary Islands projects with international scope and transformative potential.

Global Sani Hub is much more than a local project—it is a platform where research, industry, digital health, circular economy, and collective intelligence converge, giving birth to solutions that are rooted in our territory, yet respond to the world's major challenges. Here, collaboration between universities, businesses, tech centers, healthcare professionals, and public institutions is not a slogan—it is the foundation of a truly open, shared, and impactful innovation model.

From the Presidency, we fully endorse this collective effort and renew our commitment to an ecosystem that puts people first, reinforces our technological sovereignty in essential health products, and connects the local to the global. We believe Global Sani Hub will become a **bridge between regions, knowledge systems, and generations**—and above all, a tool to anticipate, care, and build a future where preventive health is a universal right, powered by innovation.

TOMÁS ARMANDO MARTÍN RODRIGUEZ
PRESIDENTE **GLOBALSANIHUB**
