

GLOBAL  
**SANI HUB**

# WHO WE ARE?

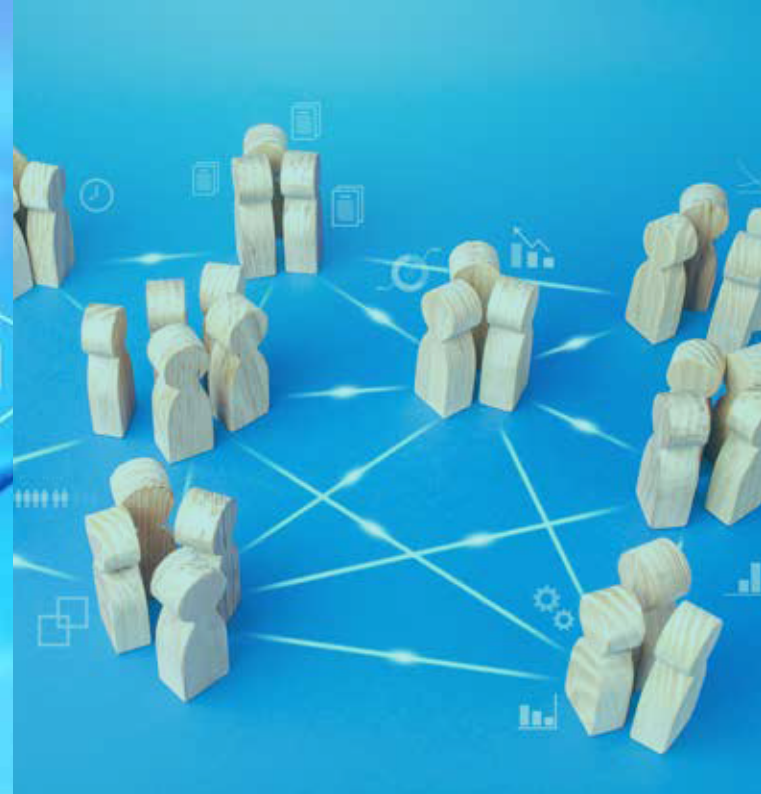

**We are a platform that brings together innovation, talent, and productive capacity to advance towards a more resilient, efficient, and interconnected healthcare system.**

**Global Sani Hub** is a strategic initiative born in the Canary Islands to drive the transformation of the healthcare and industrial sectors through innovation, sustainability, and digitalization. We bring together public institutions, companies, research centers, and civil society around a common goal: **to improve people's health and enhance regional competitiveness through high-impact technological solutions.**

We operate as a **collaborative ecosystem** that facilitates the development of high-value projects, promotes knowledge transfer, and connects the Canary Islands with national and international networks. Our work is structured around opportunity creation, access to funding, the acceleration of innovative ideas, and the industrialization of health technologies.

With a strong European vocation, we promote a **new well-being economy** based on collective intelligence, strategic autonomy in essential products, and sustainability as a key development driver.

# PARTNERS

# HUB

## WHAT IS A **HUB**?

**GlobalSaniHub brings together  
the industrial and healthcare  
sectors of the Canary Islands.**

A **Health Innovation Hub** is a dynamic ecosystem designed to foster regional development, strengthen the resilience of healthcare systems, and accelerate the digital and sustainable transition. Its objective is to consolidate high-value-added productive activities by integrating talent, science, technology, and innovation.

**Global Sani Hub** connects key actors from the healthcare and industrial sectors in the Canary Islands to catalyze solutions aligned with European priorities in public health, sustainability, digital transformation, and strategic intelligence.

## WHY A **HUB**?

**Global Sani Hub** will serve as a **strategic reference point** in the Canary Islands within the European Health Innovation Ecosystem. Its role is to foster cooperation among the four key actors of innovation:

**Public administrations, knowledge centers, companies, and organized civil society .**

This collaborative approach enables:

- The co-creation of digital and sustainable healthcare solutions.
- The promotion of a well-being-centered economy.
- The development of resilient value chains.
- The enhancement of Europe's strategic autonomy in essential health products and services.

MISSION

# MISSION

Our mission is to lead and energize an innovation ecosystem focused on improving health outcomes, strengthening the healthcare industrial fabric, and positioning the Canary Islands as a hub for innovation and industrial production in sustainable medical technologies.

We aim to:

- Facilitate collaboration in I+D+i projects, digital health, biomedicine, health logistics, and green technologies.
- Promote knowledge and technology transfer.
- Generate business opportunities with positive global health impact.
- Connect the Canary Islands to international health innovation networks.

# OBJECTIVES

- **Drive innovative technological solutions** that improve the quality, efficiency, and sustainability of the healthcare system.
- **Promote open innovation** among companies, research centers, and public authorities.
- **Accelerate healthcare sector digitalization**, including the use of AI, predictive analytics, digital twins, and interoperable tools.
- **Strengthen the circular economy in health**, prioritizing eco-design, biofabrication, and climate neutrality.
- **Support the internationalization** of Canary-based healthcare companies through access to European funding and global cooperation.

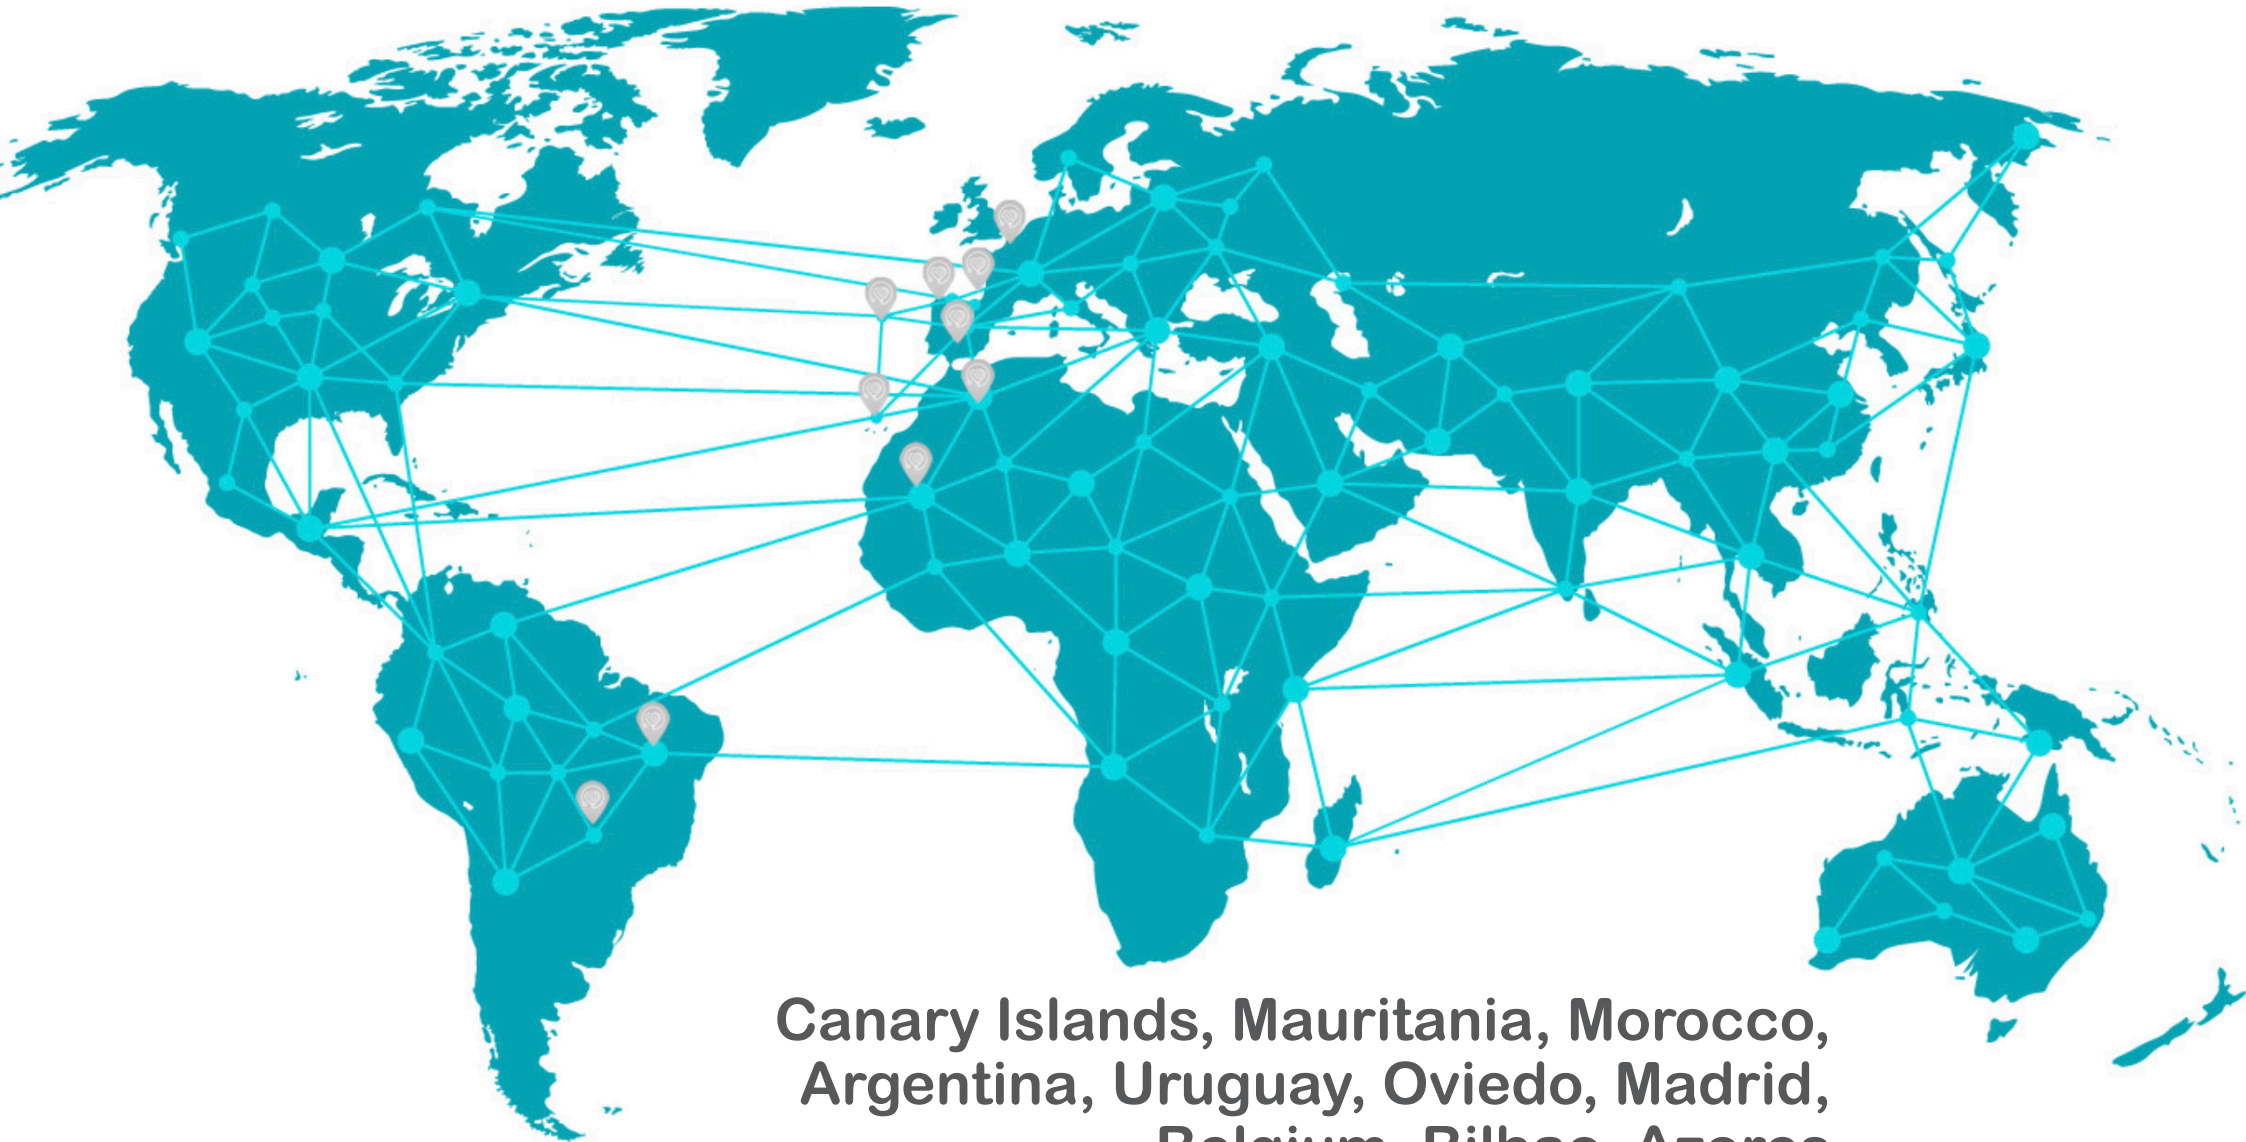

# SCOPE AND SERVICES

- **Collaborative Innovation Platform:** a physical and digital space to develop pilot projects, proof of concept, and solution acceleration.
- **Strategic advisory services** for accessing European programs such as Horizon Europe, EU4Health, and Next Generation EU.
- **Comprehensive support for public-private financing**, including national and international funding calls.
- **International partner network** and participation in technology missions, innovation consortia, and high-impact events.
- **Market Intelligence and Technology Foresight**, focused on emerging health technologies, sustainability, and regulatory trends.
- **Training and outreach programs**, aimed at young talent, health professionals, and SMEs in the sector.
